Abstract:	<p>PROBLEM TO BE SOLVED: To provide a method for manufacturing ink-removed pulp from newspaper, magazines or the like, in which the paper produced by compounding the pulp and subjecting the compounded pulp to papermaking process is free from feathering and excellent in printing property when printed with an inkjet- type printer especially using an aqueous ink, and to provide paper.</p> <p>SOLUTION: This method for manufacturing ink-removed pulp comprises a defibring process for waste paper and a successive process using a surfactant- based ink-removing agent. In the method, a cationic polymer is added. Another objective paper is made by using the ink-removed pulp.</p> <p>COPYRIGHT: (C)2001,JPO</p>
